INDIVIDUAL TREND

More and more people are following the trend of not following a trend. For these people, there is Berker Manufaktur.

This is where we create switches that are a real blend of hi-tech and handicraft, that are utterly unique. We often design items together with architects and planners for a very particular property or for a special project.

Some have their source in the very special wishes of a property owner who is looking for something which they can simply not find available on the market.

It's a source of pride to us that we can make these wishes a reality. What matters is individuality, so almost every product is one of a kind. And therefore as individual as the environment for which it has been made.

POSSIBLE VARIANTS

The surprising range of professional paint systems with qualified paints, to make our products more individual in color and feel.

Paintable are plastic, aluminium and stainless steel.
Colors in mat by RAL code or color sample.

BERKER R.3 SILK MAT FINISH

BERKER R.1 SILK MAT FINISH

BERKER K.1

REAL STAINLESS STEEL AND ALUMINIUM MATT LACQUERED

POSSIBLE VARIANTS

Anodizing with "Clariant" colors.
Satin-finished or brushed surface

Not only a variety of colors is our claim, as well the high quality and modernity of products. The high-quality anodized aluminum integrates, in its diversity, perfectly in any modern interior style - either at home or at the office.

Anodized colors and surfaces are characterized by high practicality, in terms of cleaning and scratch resistance.
